List of Varieties Regularly Available

Bare rooted trees are available during July and August. Nursery sales are from 9.00 am till 5.00 pm on Saturdays and 1.00 to 5.00 pm on Sundays during these months. Other times by appointment. Prices of individual bare rooted trees start at \$20.00 each for one year old stock. Older trees are priced according to size.

For postal orders: packages are limited to 1m length which generally limits trees for postal orders to 1 year old bare rooted stock. Postal order costs will include a \$4.00 packaging fee plus current postal charges. Extra charges apply for plant certification with orders going to SA, Tas & WA.

The following list describes the most popular varieties we normally have available. Additional varieties that may be available as trees for the current season, can be supplied as fresh grafts or ordered for next season, are listed on the reverse side. Please note, however, that this is not a complete list of all the trees in our collection. A deposit of \$5 per tree is required for trees grafted to order for next Winter.

Varieties are now mainly grafted onto Northern Spy cross 102 rootstock (50% vigour). Many varieties are available on Northern Spy rootstock (75% vigour) or MM111 (80% vigour). A limited selection of varieties are available on M9 semi dwarfing rootstock (30% vigour).

Jolly Beggar	Yellow, orange flush, medium, early cooker, February, F3
Stewart's Seedling	Yellow/green, medium, firm, subacid, strong flavoured puree and pieces, April, F3

In sourcing the original grafting material for each variety we accept the given name of the variety in good faith. We thereafter endeavour to confirm that it is true to type by observing tree and fruit characteristics from our own orchard and collection each year.
